

RFA C1+1

Compliance Plus Disaster Recovery Solution All in One “Box”

As your fund grows so do your challenges.

Manage all your messaging compliance requirements and disaster recovery with RFA Compliance One Plus One.

The Hedge Fund Industry faces a growing number of state and federal regulations that dictate how and when enterprises share information, with and among employees, partners and customers, as well as requirements for storing and retrieving records of these exchanges. In the event of disaster, these issues gain in complexity.

RFA can help your firm navigate the changing and potentially turbulent waters, and help you prepare for disasters before they hit. With RFA Compliance One Plus One [C1 + 1], you get a “one box” solution. Along with our top-notch message compliance solution we will relocate the server off site to our data center, and provide the replication of your file data as well.

Compliance + Continuity = C1+1

RFA's C1+1 is a pre-configured solution that can easily be added to your existing network, collecting Email, Instant Messaging and Bloomberg, providing a single point of response for your compliance requests or internal tracking.

The C1+1 server solution answers the two most important questions asked by potential investors—Disaster Recovery and Compliance. With RFA's C1+1, the value is more than the sum of the parts.

Messaging Management

- A single server, designed with a high degree of redundancy and 24X7 monitoring in the RFA data center
- Mailbox Management, increasing your production mail server's performance appreciably
- SEC-approved Email and IM compliance software at a lower cost of ownership than outsourced solutions
- An IM component that will actively disable any other IM client not listed as an authorized user
- Bloomberg Email capture/archive capabilities
- Compliance Officer tools for deal tracking and data management

Disaster Recovery

- Replicate file data from your office to the RFA data center
- Make file data available through Hot Site access within RFA's business continuity offices OR from remote pre-configured VPN locations
- Provide a hosted Email solution with your domain name or full replicated Email server solution, if desired.

Features & Benefits

- High Availability Server, allowing for redundancy, monitoring and fault tolerance
- Monitoring by the RFA Network Center 24X7
- Mailbox Management, reducing mail box size, increasing performance of your production mail server
- SEC-compliant integrated Email and IM compliance software at a lower cost of ownership than outsourced solutions
- An IM component that will actively disable any other IM client not listed as an authorized user
- Bloomberg Email capture/archive capabilities
- Production File data replicated in real-time to the RFA data center for access in the event of disaster
- C1+1 offers Compliance and Disaster Recovery on a single server, off site at our secure data center
